Engagements made simple

Get the most out of your engagements, with Sage Pastel Auditor.

Our Auditor software covers all types of engagements, from compilations to audits. We'll help you extract a full set of annual financial statements for all entities, draw up monthly management accounts, plot trends, and drill down into the source data. Allow us to streamline your engagement with our working papers and methodologies, specifically written for the accounting officer, independent review, practitioner or auditor.

Our software seamlessly integrates with all of our accounting products, as well as allowing for a simple trial balance import. An easy to use mapping tool ensures all elements are disclosed within the financial statements and reports. As Microsoft Excel is the tool of choice for accountants, all the reports are extracted into this format. All templates included in the package are fully customisable, allowing you the flexibility of creating your own layouts most suitable to your practice.
